A S M SAIM

Full-Stack Developer

Dhaka, Bangladesh | +880 176-8692766 | saim777m@gmail.com | github.com/asm-saim | linkedin.com/in/asmsaim | Portfolio

Professional Summary

Full-Stack Developer with a B.Sc. in Computer Science and Engineering, specializing in building responsive, user-focused web applications with React, Next.js, TypeScript, Node.js, Express.js, and MongoDB/PostgreSQL. Experienced in designing REST APIs, implementing authentication, and delivering clean interfaces with Tailwind CSS. Combines strong technical fundamentals with professional experience in a fast-paced work environment, bringing reliability, communication, and problem-solving skills to every project.

Technical Skills

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, React Router, Recharts

Backend: Node.js, Express.js, REST APIs, JWT, Authentication, Better Auth

Databases: MongoDB, PostgreSQL, MySQL, Mongoose

Tools & DevOps: Git, GitHub, Docker, Vercel, Netlify, Postman, VS Code

Projects

BazarDor | *Bangla Commodity Price Tracking Platform* Live Demo GitHub

Next.js, React, TypeScript, Tailwind CSS, Better Auth, MongoDB Atlas, HeroUI

- Built a Bangla-first, responsive web app displaying daily essential-commodity prices for Bangladesh, with Bengali numerals, category browsing, and price sorting.
- Implemented secure authentication with Better Auth (email/password, Google, GitHub OAuth), MongoDB Atlas storage, and route protection that redirects unauthenticated users from private pages.
- Developed product detail pages showing minimum, maximum, and average prices with a division-wise market price table, plus a live price ticker and top risers/fallers dashboard.
- Added profile management, skeleton loaders, toast feedback, and custom 404 handling to improve user experience.

FitLog | *Workout Tracking & Planning App* Live Demo GitHub

Next.js, React, TypeScript, Tailwind CSS, Context API, React Toastify

- Developed a responsive, dark-themed workout tracker where users browse an API-fetched exercise library and build a daily training plan.
- Implemented plan management (add, save for later, mark done, remove) with a five-exercise daily limit, using Context API for shared state and live navbar counters.
- Built a My Plan dashboard with real-time totals for exercises, minutes, and calories, and sorting by duration, calories, or rating.
- Used the Next.js App Router for dynamic detail pages and added loading states, empty states, toast notifications, and a custom 404 page.

Simplico | *App Discovery & Management Platform* Live Demo GitHub

React.js, JavaScript, React Router, Tailwind CSS, Recharts

- Built a responsive app-store-style interface for discovering, viewing, and managing mobile applications.
- Implemented dynamic search, application details, installation management, and installed-app tracking using reusable React components and state management.
- Created responsive layouts with Tailwind CSS and integrated data visualization features using Recharts.

Experience

Bangla Tel Group Dhaka, Bangladesh

System Engineer – NOC *Feb 2024 – Present*

- Monitor and troubleshoot telecom network infrastructure across IGW, ITC, IIG, ICX, and ISP operations using monitoring and network management tools.
- Analyze network traffic, connectivity, optical power, system alarms, and service performance to identify operational issues and support timely resolution.
- Prepare technical reports and operational data while coordinating with technical teams to maintain service availability and network reliability.

Education

International Islamic University Chittagong (IIUC) Chittagong, Bangladesh

B.Sc. in Computer Science and Engineering – CGPA: 3.34 / 4.00 *2018 – 2023*

Additional

Languages: Bangla (Native), English (Professional Working Proficiency)
